

**ODESSA COLLEGE ASSOCIATE DEGREE NURSING PROGRAM  
SYLLABUS RNSG 1144 Spring 2011**

**COURSE TITLE:** NURSING SKILLS II

**CREDIT:** 1 HOUR (3 CONTACT HOURS-LABORATORY)

**PLACEMENT:** THIRD SEMESTER OF NURSING PROGRAM

**PREREQUISITES:** PROGRAM ADMISSION OR CONSENT OF DEPT.  
RNSG 1443; RNSG1361; RNSG2213 & RNSG2160

**CO-REQUISITES:** RNSG 2201; RNSG 2261; RNSG 2208; RNSG 1161

**LICENSING/CERTIFICATION AGENCY:** TEXAS BOARD OF NURSING (BON)

**FACULTY:** Durcilla Williams, MSN, RN (Course Coordinator)  
Office Phone: 335-6465 Office Location: CT 220A  
Cell Phone: 432-664-6234

**COURSE DESCRIPTION:** A health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, concepts, and critical thinking skills. Direct supervision is provided by the clinical professional in the skills lab during the simulations with debriefing and discussion with their peers. (SCANS 4, 5, 6, 8, 9, 10, 11)

**LEARNING OUTCOMES:** As outlined in the learning plan, the student will apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

**COURSE OBJECTIVES:** Course objectives utilize the framework of Differential Entry Level Competencies of Graduates of Texas Nursing Programs. At the completion of the course, the student should be able to: (PO=corresponding program outcome)

**As Provider of Care:**

1. Formulate a plan of care for the client based on the health status, health needs, and interpretation of health data. (PO1).
  - a. Analyze data to determine when health status is changing, and appropriate actions to take to avoid unanticipated outcomes.
  - b. distinguish psychosocial, developmental, and cultural factors to provide holistic care of the adult client and family.
  - c. Integrate skills in administration of parenteral, intravenous, and non-parenteral medications.
  - d. Outline actions to decrease untoward effects of medications, while observing for changes in the client's condition.

2. Utilizing decision making skills organize clinical data to determine appropriate nursing diagnoses, outcomes, interventions for the client. (PO 2, 3, 7)
  - a. Formulate appropriate nursing diagnoses for clients with complex health problems.
  - b. Collaborate with client, family and other health care team members to arrive at goals to meet client health needs.
  - c. Distinguish client needs and correlate with interventions that will achieve goal and promote a positive outcome.
  - d. Discriminate when it is appropriate to call for assistance, or to contact medical staff.
3. Outline teaching plans to promote, maintain, and restore health of the client. (PO 2, 4)
  - a. Identify verbal and non-verbal communication techniques with team members while adapting to common medical, surgical, maternal, and pediatric patient health alterations.

**As a Coordinator of Care:**

4. Correlate needed human and material resources for the provision of care. (PO 8)

**As Member of Profession:**

5. Explain accountability and responsibility in performance of nursing care. (PO 12)
  - a. Identify legal and ethical boundaries for care, to include the TNPA and ANA Standard of Care as guidelines.

**Teaching/Learning Methods**

The following methods may be incorporated into RNSG 1144: Skill demonstration during a critical thinking exercise or scenario with role playing, group participation, peer interaction, small group discussions, and instructor evaluations during debriefing. The traditional students need to sign up for Monday or Wednesday morning labs. (Limit 12 per day). Please make sure that at least half of the Pedi and half of the OB students are in each morning group. The students will be divided up into teams of four students by the instructor and that will be your team the entire semester. There will be no swapping between Monday and Wednesday labs since the student is part of a team and teamwork is stressed during the simulations. Students will rotate within their team into the roles of the team leader, second nurse, patient or family member, and recorder. The second nurse may also serve as a staff member serving as respiratory therapist, laboratory personnel, or other interdisciplinary personnel found in the hospital. Teamwork is greatly encouraged so each team member can be a reference or resource for the leader during the simulation. Each of the team member points are based on how well you participate during the simulations and how well you support your team leader. The students receive report (based on the instructor prepared scenario) and are required to manage the situation using the nursing process and critical thinking skills after a prescribed preparation time. References, including those available electronically, are available for student use will be located in the lab. An instructor continually monitors the scenario and interacts with students. When the scenario is complete, group discussion focuses on the accuracy of the assessment on the client; the interventions taken based on the changes in the condition of the client; and, the effectiveness of group process. The scenario and interactions of the group are video taped for use during debriefing.

**EVALUATION AND GRADING:** The grading policy for the Associate Degree Nursing Program is followed. Student performance is evaluated using established grading criteria and

instructor observation. Group members are graded related to participation and teamwork demonstrated during the simulations. Simulation course objectives and the simulation evaluation forms provide the objective measure of the students and the group's performance. These forms, which provide the grading criteria for this course, are included at the back of the syllabus. Students will receive a numerical grade based on the points. **A grade of 75 % or greater is required to pass the Skills II course.** The grade of a 74.99 will NOT be rounded up to receive a 75 % or a passing grade.

Theory grades are assigned according to the following scale:

90-100	A
80-89	B
75-79	C
60-74.99	D
Below 60	F

Evaluation criteria include assessment skills, organizational skills, and critical thinking during each simulation. Evaluation of course competencies also occurs with written testing. Points are assigned for course components and the grade is weighted:

3%	<b>Community Service or Volunteer or Extra Assignment</b>
3%	<b>Attendance (class time counts as 24 clinical hours) all missing labs must be made up</b>
24%	<b>Role of the group or team leader (3 times total) Student needs to score a 75 or higher on ONE leader grade to pass course</b>
30%	<b>Role as group or team member (9-10 depending on the number in each group)</b>
5 %	<b>Professional Development Software PDS Assignment (18 scenarios)</b>
10%	<b>What is wrong with Simulation (Individual Grade)</b>
<b>25 %</b>	<b><u>Written Final Exam (Individual Grade)</u></b>
<b>100%</b>	<b>Total</b>

**CORRELATION OF THEORY TO SKILLS LAB EXPERIENCE:** The laboratory experience builds on knowledge and skills and theoretical concepts learned in the first year of the nursing program. The first scenarios have a medical-surgical nursing focus since students have not established a knowledge base for the obstetrical or pediatric client. As the third semester progresses, scenarios include theory related to nursing care of children, families, or the obstetrical client.

Any identified weakness will need to be strengthened by the end of the course. Standard performance (or a score of 3) of the simulation objectives signify at least minimal accomplishment of tasks as stated or required. The student should demonstrate consistency in performing nursing responsibilities. **A standard performance (3) on all objectives during on the summative (final) evaluation is necessary for the student to earn a passing grade of a 75 in Nursing Skills II course. It is required for the student to achieve a score of 75 on at least ONE of their three leader grades in Nursing Skills II in order to pass Nursing Skills II course.**

#### **COURSE POLICIES:**

ALL STUDENTS ARE EXPECTED TO:

1. Adhere to requirements delineated in the Odessa College Nursing Student Handbook.

2. **Must complete all 18 of the PDS simulation lab assignments (with passing score of 75 on EACH of the THREE PATIENTS per System) by due date posted. Refer to calendar.** Must do 18 patient scenerios in PDS that may include Adult Health Six Sections or Maternal Child three sections or Pediatric three sections. Total of 18 patients must be completed by due date. Only two attempts are allowed on each patient and additional attempts will be subtracted from the total grade. Thanks
  - a. If all the PDS simulation lab assignments are not done by the **due date (see calendar)** they will be **considered LATE and considered a make-up grade and the grades from the PDS will be multiplied by 79% of the grade just like a make up lab simulation.**
  - b. If all the PDS simulation lab assignments are not done by the **day of your scheduled final exam the grades from the PDS will be reduced further and the grade will be multiplied by 69% of the grade.**
  - c. If the PDS simulation lab assignments are not completed by the **end of the semester the student will receive an INCOMPLETE for the course.**
  - d. **Academic honesty on the assignment is expected as outlined in the Odessa College Student handbook.**
3. **A passing grade of 75 on at least ONE leader grade is required to pass the course.** All simulations are graded based on observation of each of the student's performance or participation. Student should apply skills and theory taught in the classroom and utilizes critical thinking skills to meet the objectives in the simulation skills lab.
4. **Simulation lab attendance is mandatory since the lab counts as 24 clinical hours.** Back up plans need to be made just in case of family illnesses. **To report simulation absences call the simulation lab instructor on her cell phone at least one hour before the start of class.** Any missed class time **MUST be MADE UP** since it counts as **24 clinical hours.** All lab time must be made up as determined by the instructor under the following guidelines:
  - #1 Any team leader or team member that calls the lab instructor **WITHIN one hour** of the lab time will be allowed to make up the team member or leader grade at the convience of the lab instructor. **However, the make up grade will be multiplied by 79% of the grade earned on the make up.**
  - #2 If the team leader or team member **does not call and does not show** up for the lab it will be considered a **NO CALL and NO SHOW** and the make up grade for the **NO Call and NO show will be further reduced and the grade received will be multiplied by 69% of the grade earned on the make up. The make up will be done at the convience of the lab instructor.**
  - #3 **Make up lab time must be completed within TWO WEEKS of the MISSED lab time or the student will not be allowed to make up the lab time and the grade of ZERO will stand for the day of missed simulation lab.**
5. Cellular phones and beepers must be turned off while in the simulation lab. Phone calls must be made during breaks or lunch. **If a student accepts or makes cellular phone calls while in the simulation lab or during the scenarios, it will be considered unprofessional conduct and an unsatisfactory for professionalism will be given for the day and they will have to make up the simulation and be graded as a make up grade.**
6. All medications are to be LOOKED UP before giving them in the simulation lab. A medication list will be posted in advance for you to look up and BRING the information with you. You need to know the classifications, therapeutic effects, adverse effects, routes given, STANDARD Dosage, and nursing considerations of these medications. During the PREP TIME the medications information should be WROTE on the Students Pharmacology Simulation Record before you start your simulation. If the medications are NOT written up

and turned in at the end of the simulation a 0 will be given for the GROUP for that day of simulation.

**Special Needs** Odessa College complies with Section 504 of the Vocational Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990. If you have any special needs or issues pertaining to your access to and participation in this or any other class at Odessa College, please feel free to contact me to discuss your concerns. You may also call the Office of Disability services at 432-335-6861 to request assistance and accommodations.

### STUDENT CONTRACT

I have read the syllabus for Skills II and will abide by the rules and guidelines outlined in the syllabus. I have read the Odessa College Handbook, and the Nursing Department Student Handbook. I understand the requirements, grading policies, and attendance policies for the theory of this course.

The objective of the Odessa College Simulation Lab is to assess, educate, and improve the nursing student's performance in evolving health care crisis situations. The Simulation Lab is designed to challenge the nursing student's response and judgment in a clinical environment. During your participation in a simulated clinical experience at the Odessa College Nursing Simulation Lab, you will be video taped for the purpose of faculty review, debriefing, and improving your nursing skills.

By signing this agreement, you agree to maintain strict confidentiality regarding both yours and others performance, whether seen in real time, on video or otherwise communicated to you. Failure to maintain confidentiality may result in unwarranted and unfair defamation of character of the participants. You will be discussing the scenarios during debriefing, but we believe that **“All that takes place in the simulation environment – stays in the simulation environment!”** To maintain optimal simulation experiences for the other learners who will be following you in the simulation lab, you are to maintain strict confidentiality regarding the specific scenarios, as well as what happened during the simulation experience. A breach of confidentiality may result in reduction of grades received. **Need to initial each statement below and sign at bottom.**

\_\_\_\_\_I agree to maintain strict confidentiality about the details of the scenarios, participants, and performance of any participant(s).

\_\_\_\_\_I authorize the Odessa College Skills Lab staff to video record my performance during clinical simulation experience in the simulation lab.

\_\_\_\_\_I authorize the Odessa College Skills Lab staff to use the video recording(s) for purposes including, but not limited to: debriefing, faculty review, educational, research, public relations.
